

The following chart is a collective update for the projects that you may have been asked to submit possible locations or supporting information to the Business Development Department of the Lafayette Economic Development Authority. Please cross-reference the **Project Name** that was issued in each request that have chosen to participate by submitting sites or data.

Status Definitions

In order to have a better understanding of the status of each project defined by the Business Development department, please review the following parameters:

AS = Accepting Sites

If the status is **AS** and has not been marked as **Submitted**, LEDA is in the process of collecting sites and supporting data to deliver to the client. Sites and supportive data may still be sent to LEDA in order to submit to the client.

If the sites have been **Submitted**, the client is in the review process of the information delivered by LED or LEDA. The client will either contact the broker directly or LEDA will contact the broker as soon as any additional research, information, or a site visit is required.

P = Project Pending

The client has narrowed down the initial sites that have been presented and is now in the final phases of locating in Lafayette. Pending may include hurdles such as property negotiations, plan/plat approval, and/or other local variables.

L = Located

The client has successfully located their operations in Lafayette and the project will be removed from the next update.

T = Project Terminated

The client has eliminated Lafayette as a possible location for their operations and the project will be removed from the next update.

** If the status is **Postponed**, the project has been listed by the state as "on hold." The project will remain documented and all parties will continue discussions and correspondence but the sites submitted should continue to be marketed for future development.

Origin		Project Name	Company Information	Area Needed	Building Specifications	Status	
Mar-11	LEDA	Gray Water	Engaged in water waste storage, transportation and recycling for industrial clients	3 -5 acres of land	5,000 s.f. warehouse with 3-5 bay doors. Also needs an additional 2,000 s.f. office	Submitted	AS
Mar-11	LED	Rotary	Engaged in activities related to industrial research and development	10 acre minimum for land	70,000 - 100,000 s.f. facility	Submitted	AS
Mar-11	LEDA	Toy Story	Engaged in mill-working and distribution	Minimum of 3 acres zoned for industrial	Existing warehouse with 20,000+ s.f. for light millwork with an additional 2,000 s.f. for office	Submitted	P
May-11	LEDA	Melting Pot	Engaged in food manufacturing, packaging and distribution	2-4 acres of land	12,000 to 18,000 s.f. facility	Submitted	P
May-11	LEDA	Gear	Engaged in gasification and manufacturing of parts for biodiesel companies	2 acres of land near Scott	10,000 s.f. facility	Submitted	AS
Jul-11	LEDA	Humphrey	Engaged in retail	1,500 s.f.	Glass front with heavy traffic	Submitted	AS
Aug-11	AEDC	Independence	Unknown at this time	100 acres of land	1,000,000 s.f. with very specific needs for high capacity utilities and transportation	Submitted	AS
Nov-11	LEDA	Sushi	Engaged in seafood processing	Existing industrial facility with 30,000 to 50,000 s.f.	Located near or adjacent to I-10. 2-3 acres of land with build to suit option.	Searching	AS
Nov-11	LED	Census	Engaged in manufacturing of nutritional products	Existing industrial facility	Existing industrial facility with 100,000 and 12 ft. ceiling height. Prefers loading docks, rail access and to located in a rural area but not required.	Submitted	AS
Dec-11	LEDA	Green Auto	Engaged in conversion of natural gas vehicles	25,000 to 30,000 s.f.	Existing facility, possibly a former dealership with service and office space	Searching	AS
Dec-11	LED	Beta	Engaged in manufacturing of lithium ion battery cells and packs for the automotive industry	40 to 60 acres	Green space, outside of 100/500 year flood area, heavy industrial. 25-32 MW, minimum of 138 kV transmission, dual/redundant. 5,600 GPD water and 4,400 GPD waste water	None	T
